PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer specializing in React, Next.js, and Node.js ecosystems. Proven ability to rapidly prototype and deploy enterprise-grade applications, utilizing GenAI-assisted workflows to condense development cycles. Expertise in system architecture, technical SEO, and building custom, zero-cost internal tools that directly drive business revenue and operational efficiency.

TECHNICAL EXPERTISE

- **Frontend Architecture:** React.js, Next.js (SSR/SSG), TypeScript, Redux Toolkit, TanStack Query, Tailwind CSS.
- **Backend & APIs:** Node.js, Express.js, WebSockets (Socket.io), RESTful API Design, JWT Security.
- **Database Engineering:** PostgreSQL, MongoDB, Prisma ORM, SQLite, Advanced Schema Design.
- **Cloud & DevOps:** Docker, GitHub Actions (CI/CD), Linux VPS, AWS (EC2, S3), Nginx, Cloudflare CDN.

KEY ENGINEERING ACHIEVEMENTS

Custom WhatsApp SMS Broadcasting Platform

House & Hedges Real Estate

- **Velocity & AI Integration:** Engineered and deployed a proprietary enterprise communication tool from scratch in just **1 month** utilizing GenAI-assisted development.
- **Cost Efficiency:** Eliminated reliance on expensive third-party marketing subscriptions by building a secure, local broadcasting system to dispatch high-volume marketing campaigns.
- **Architecture:** Decoupled system utilizing a Node.js backend for message-throttling queues, PostgreSQL/Prisma for campaign metadata, and a React/Tailwind dashboard with TanStack Query for real-time delivery tracking.

Enterprise Real Estate Platform Re-Architecture

House & Hedges Real Estate

- **Legacy Migration:** Led the end-to-end migration of a broken legacy WordPress site to a modern, custom full-stack system.
- **Performance & SEO:** Re-architected the frontend to Next.js for native Server-Side Rendering (SSR), bypassing rendering bottlenecks.
- **Business Impact:** Executed comprehensive technical SEO optimizations (dynamic sitemaps, LCP tuning, Cloudflare CDN), driving an immediate **40% increase in digital lead generation**.

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer & IT Coordinator

House & Hedges Real Estate | Dubai, UAE | Sep 2025 – Present

- Containerized the company's application ecosystem using Docker and established automated zero-downtime CI/CD pipelines via GitHub Actions directly to a self-hosted VPS.
- Engineered secure data extraction scripts to migrate historical property listings and off-plan projects into a newly structured PostgreSQL database without data loss.

- Operate as the sole IT Coordinator, managing corporate email configurations, hardware diagnostics, and staff technical training.

Full Stack Web Developer & DevOps (Self-Directed Track)

Remote / Independent | Jan 2025 – Sep 2025

- **Omnichannel POS System:** Built a high-complexity Restaurant Management Platform using TypeScript, Node.js, and MongoDB, integrating WebSockets for sub-second kitchen-to-server communication.
- **Social Network Application:** Developed a real-time social platform featuring dynamic timelines, asymmetric user graphs, and instant messaging, deployed securely on AWS EC2/S3.

IT Technical Specialist / Support

JM505 Computer Sale and Service | Bangkok, Thailand | May 2024 – Dec 2024

- Executed rapid hardware diagnostics, OS deployments, and system optimizations across high-volume inventories.
- Streamlined logistics and documentation for delicate replacement parts and hardware stock.

Junior Frontend Developer (Internship)

Promes MM | Yangon, Myanmar | Apr 2023 – Nov 2023

- Developed highly responsive, production-ready Billing Collection Dashboards for an Internet Service Provider utilizing React Admin, Parse Server, and Bootstrap.

EDUCATION

Bachelor of Computer Science

University of Computer Studies (2015 – 2019)
